Summary

Bachelor of Business graduate from RMIT University Vietnam (top 10% of cohort), majoring in International Business with a minor in Logistics & Supply Chain Management. Across my academic projects, I consistently gravitated toward the more operationally complex logistics problems - freight operations, cold-chain warehouse design, last-mile network modelling - because I find real satisfaction in working through problems where the details and stakes both matter. Hands-on operations at GHN reinforced that: reliable service is earned through precision, under pressure, every day. International freight forwarding is an industry where operational complexity, precision, and service quality are non-negotiable - and those are exactly the conditions where my analytical thinking and attention to detail perform at their best.

Education

RMIT University Vietnam

Hanoi, Vietnam

Bachelor of Business in International Business; Minor: Logistics & Supply Chain Management

April 2026

GPA: 3.2/4.0; Graduated with Distinction (top 10% of cohort)

Experience

Giao Hang Nhanh (GHN)

Hanoi, Vietnam

Operations Team Leader Trainee

Apr 2026 – Jun 2026

- Gained hands-on exposure to last-mile operations — sorting, inventory management, delivery documentation, and last-mile dispatch in a high-volume environment.
- Delivered parcels directly to customers, developing firsthand understanding of last-mile service quality and customer expectations.
- Applied structured problem-solving frameworks in operational and people management contexts.
- Developed foundational people management skills including team communication, performance tracking, and structured onboarding design.

University Projects

FedEx Barcelona Operations Improvement Project

Aug 2025 – Sep 2025

- Independently analyzed a daily parcel-sorting operation at FedEx Barcelona, identifying root causes of delays and systemic underperformance through structured observation and data tracking.
- Built an Excel-based KPI tracker to monitor operational performance and present findings through clear tables and visuals for stakeholder reporting.
- Delivered an executive report covering actionable recommendations, cost evaluation, a phased implementation plan, and risk considerations — scoring above 80/100 for analytical rigor and practicality.

Procurement & Sourcing for Vietnamese Micro-Enterprises

Mar 2025 – May 2025

- Led a team of 4, assigning responsibilities, tracking progress, and ensuring alignment on priorities and deadlines throughout the project.
- Conducted interviews with 5 stakeholders to map procurement coordination points, identify common failure risks, and surface real operational pain points.
- Built an Excel-based supplier scorecard to support data-driven sourcing decisions and mitigate stockout and overstock risks — scoring above 80/100 for analytical depth and teamwork.

Warehouse Design Project

Jul 2025 – Sep 2025

- Collaborated in a team of 5 to design an end-to-end operating flow for a cold-chain warehouse supporting both domestic and export supply chains.
- Incorporated RFID and WMS integration concepts to enable real-time inventory tracking, status visibility, and

end-to-end traceability across operations.

- Contributed to a final submission that scored above 70/100 for analytical execution and systems thinking.

Sustainable Urban Logistics Case Study

Mar 2025 – May 2025

- Independently designed a scalable last-mile delivery network for Hanoi, aligning fleet mix to demand patterns and service area requirements.
- Built an Excel-based performance tracker to evaluate service level trade-offs — comparing on-time delivery rates and first-attempt success against operational costs.
- Developed a tiered SLA framework to balance customer expectations with operational feasibility — scoring above 80/100 for solution innovation.

Skills

Language: Vietnamese (native), and English (IELTS 6.5).

Supply Chain & Logistics: Incoterms 2020, ocean freight forwarding (FCL/LCL), international trade documentation (Bill of Lading, commercial invoice, packing list, certificate of origin), customs clearance process, supply chain coordination, procurement & sourcing, WMS/TMS concepts, KPI management, Lean/5S and continuous improvement.

Analytics & Tools: MS Excel (Advanced — pivot tables, complex formulas, dashboards), R Studio, Python (data analysis), AI tools (ChatGPT, Claude, Gemini, NotebookLM).

Soft Skills: Structured problem-solving, analytical thinking, team coordination, stakeholder communication, detail orientation, adaptability, time management, willingness to learn, able to work under pressure.
